Business Managers,

Section 10-220 of the Connecticut General Statutes requires school districts to report on the condition of its school facilities. Pursuant to Public Act No. 13-247, the information will be used by the Commissioner of Administrative Services to prepare a triennial report for submission to the General Assembly.

The School Facilities Survey (ED050) may be accessed via the Department of Education's data collection Web site:

<https://www.csde.state.ct.us/>

(Once logged in, click on the School Construction - School Facilities Survey - ED050 link.)

For your convenience, the blank survey form and instructions are posted on the Department of Education's main Web site:

<http://www.sde.ct.gov/sde/cwp/view.asp?a=2636&q=320560>

There have been several changes to the survey that we would like to highlight:

* A question has been added to the Building Conditions section of the survey regarding the installation of carbon monoxide (CO) detection and warning equipment.

* A section has been added to the Building Conditions section of the survey to address School Security as a result of the passage of Public Act 13-3, which relates to school security, school building infrastructure, the development and implementation of school security infrastructure standards and school safety/security plan standards. Though the requirements of Public Act 13-3 do not take effect until 2014, it is imperative that school districts be aware of the impending obligations. It is also necessary to collect this information, since the school security grant, administered by the Department of Emergency Services and Public Protection (DESPP) includes many of the components that become mandatory after January 1, 2014.

All surveys should be completed and certified by superintendents no later than October 31, 2013.

If you have any questions, do not hesitate to contact Michelle Dixon, Office of School Facilities, at michelle.dixon@ct.gov or 860-713-6477.

Thank you.
